*THE
IMPLEMENTATION
EXPERTS!*

BRINGING TOGETHER THE KNOW-HOW AND THE EXPERTISE OF ALL PLANNING AND MANUFACTURING DIVISIONS, MAGNA STEYR INDUSTRIAL SERVICES OFFERS YOU EXCLUSIVE ACCESS TO MAGNA STEYR'S EXTENSIVE KNOWLEDGE BASE. WHAT SETS US APART FROM TRADITIONAL CONSULTING SERVICE PROVIDERS IS THAT WE ALSO SUPPORT YOU DURING THE IMPLEMENTATION PHASE.

WE ARE IMPLEMENTATION EXPERTS!

Magna Steyr Industrial Services advises you and supports you from the definition of the objectives right through to the physical implementation. Our understanding of highly complex issues allows us to develop groundbreaking but easily implemented solutions – always tailored to the needs of your company. By increasing your company's efficiency, these solutions improve its competitiveness and earnings situation. What makes us special is that we do not only come up with theoretical solutions. We also implement them on site together with our customers. This allows us to **drive sustainable change** and **achieve measurable success** in partnership with our customers.

OUR RANGE OF SERVICES...

We develop tailored solutions working in partnership with our customers and building on our comprehensive experience. Our range of products covers workflow and process planning, all optimization-related activities, worker support on the shop floor and interim management.

Lean management consulting Optimizations

Perceived quality *WORKPLACE ORGANIZATION*

Problem management *Analysis methods*

Maintenance concepts

PROCESS AND EQUIPMENT PLANNING

Interim management Feasibility studies

Shop floor management

Change management

Task force management Supplier management

START-UP MANAGEMENT

FEASIBILITY STUDIES

We produce clear and viable project studies for you – from planning the individual process steps, carrying out risk analyses and layout planning through to the selection of a suitable production site.

PROCESS AND EQUIPMENT PLANNING

We regard our capability to plan the full range of production and logistics processes and associated systems as one of our biggest strengths. It stems from our detailed knowledge of production requirements from individual components for niche products to volume production.

START-UP MANAGEMENT

Depending on the requirements of our customers we support, plan and execute the start-up of production from the initial development until high-volume production is achieved and beyond. With our comprehensive experience for complete vehicle and part vehicle start-ups at the location in Graz we are your ideal partner to master this challenging phase.

SHOP FLOOR MANAGEMENT

We organize the most important activities in your production in cooperation with you so that your company benefits directly and secures a head start from our leading-edge know-how. We jointly define the objectives, provide planning and controlling support and monitor the achievement of the goals.

PERCEIVED QUALITY

The perceived quality must satisfy the customer's expectations. Ultimately it is only the quality "as seen through the eyes of the customer" that counts! Our many years of proven experience flow in to help you accomplish your individually defined quality objectives.

TASK FORCE MANAGEMENT

Our experienced employees offer prompt support on location. Our experts provide the necessary experience and methods for your project so that you are able to achieve the required results quickly.

PROBLEM MANAGEMENT

The structured analysis of disruptions and the development of permanent corrective measures by means of established problem-solving methods and tools add up to effective problem management.

LEAN MANAGEMENT CONSULTING

Our experienced experts analyze different areas and processes of your company with special focus on waste and introduce targeted measures to exploit existing potentials in your system.

WORKPLACE ORGANIZATION

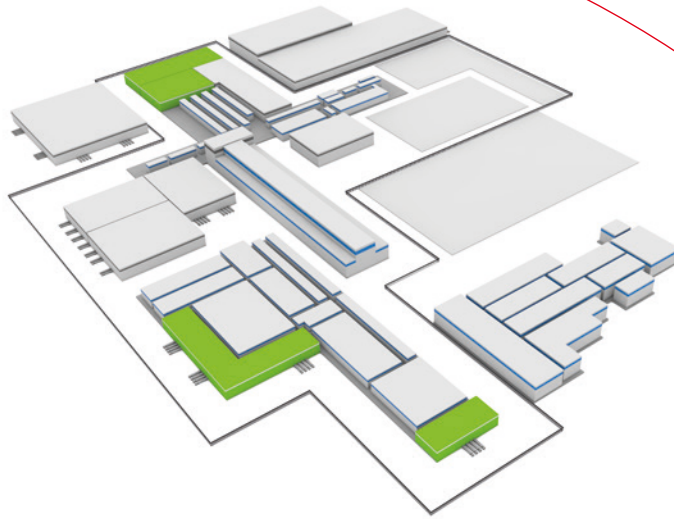

We apply the experience from our workplace profiles to find the optimal solution for your specific application. An excellent workplace organization with 5S and visual management as key components is fundamental for the continuous improvement of the processes, quality and efficiency increases in production.

OPTIMIZATIONS

We rely on our broad knowledge base to successfully implement optimization measures and capacity-increasing projects. Joint implementation is the key to success. We contribute our experience, structured methods and tools to the conceptual design and implementation.

ANALYSIS METHODS

We apply efficient methods such as value stream mapping to evaluate individual activities and analyze waste in the value chain. Our employees, trained in special internally designed training courses, master a wide range of methods. The objective is always to establish hard facts from which we jointly develop recommendations for action.

CHANGE MANAGEMENT

We live in volatile economic times. As your experienced change agent we coordinate new strategies, introduce new structures or implant new complex processes to ensure that your organization successfully copes with these dynamic changes of the environment.

SUPPLIER MANAGEMENT

Your success depends very much on efficient supplier screening and a perfectly coordinated supplier performance. With our know-how we help you to track deadlines and monitor the quality of your projects all over Europe.

MAINTENANCE CONCEPTS

Working with your technical experts we develop a suitable maintenance strategy to optimize the availability of your systems and facilities. The creation of data and the implementation of preventive maintenance is an essential part of this task.

INTERIM MANAGEMENT

Experienced employees are available at short notice to fill gaps in your line organization and provide first-class temporary support. This time-limited activity continues until either stabilization or the agreed objectives have been achieved.

Over 100 years of experience in vehicle production and a broad range of services make Magna Steyr the worldwide leading brand-independent engineering and manufacturing partner for OEMs.

Our broad range of services comprises:

Engineering:

System and module engineering services including complete vehicle engineering

Contract manufacturing:

Flexible solutions from niche to volume production at world-class level

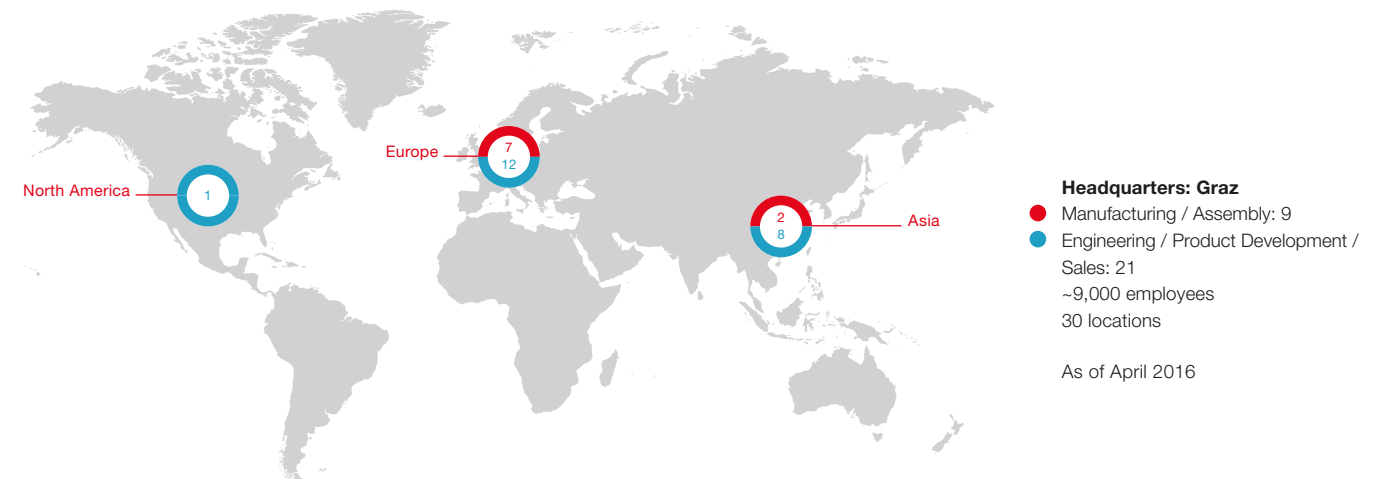

Fuel systems:

Energy storage systems made of steel, plastic and aluminum

As a contract manufacturer, we have produced more than 3 million vehicles – of 22 different models – to date.

Globally 9,000 employees support these services. Based on this global network of 30 locations on 3 continents, we are always close to our customers.

As an innovative company, we are always searching for new and improved solutions for our partners and strive for top quality at competitive prices. Vehicles are not merely our business, they are our passion. We put this passion at your disposal.
