

Modular Drive System

The new Modular Drive System is a scalable and configurable concept which minimizes overall system complexity in every aspect.

Competitive advantage/differentiators

- Reduced part count and complexity by 425%
- Reduced mass by 41%
- Increased robustness
- Simplified assembly process
- Validation Confidence

Applications

- Adaptable for most aero systems
- Utilizes Magna's new M3A actuator with declutch
- Complete design and assembly flexibility with press fit linkages and actuator
