

Radar Cover & Sensor Integration Panel

Magna's Radar Cover offers Improved technology and provides an alternative to current production offerings in the rapidly growing market for radar systems

Competitive advantage/differentiators

- Finished part out of the mold, no joining technology necessary
- Freedom of design, true depth of image not simulated
- Better radar transmission for 77.79GHz frequencies

Applications

- Magna is your single source interface for development and delivery
- Depending on OEM Strategy, Sensor integration for Radar, LiDAR, Ultrasonics and Cameras based on vehicle requirements
