

INVITATION

**MAGNA at IAA
Commercial Vehicles
2012 in Hanover**

September 20 - 27, 2012
hall 16 / booth C23

All about **efficiency**

**More efficient, safer and cleaner:
Visit MAGNA at IAA Commercial Vehicles 2012 in Hanover.**

It is our mission to make tomorrow's commercial vehicles more efficient, safer and cleaner by developing innovative products, systems and complete vehicles.

We will deliver proof of this objective at IAA Commercial Vehicles: among other things, we will introduce our newly developed steel frame, which weighs 30% less than conventional models, as well as our HyDEM hybrid truck, which runs entirely on electricity for short-distance trips.

Come and experience these and other fascinating highlights as you discover the world of Magna. Our company develops and delivers various components, from trim and chassis to drive trains, up to and including complete vehicles based on your specifications and requirements.

We look forward to welcoming you to Hanover soon!

With best regards in anticipation of your visit.

Commercial vehicle solutions *for maximum
efficiency in each area:*

Engineering efficiency, production efficiency, team efficiency, transportation efficiency
